Professional Summary

- Technical writer, project manager, and business analyst with 10+ years of experience in leading developer and no-code documentation, eliciting requirements, and using tools to work with modern data.
- Clear, engaging, meticulous SEO content writer, UX writer, and copy editor. Gained precision by proactively seeking feedback.
- Developer support engineer passionate about creative problem solving with new tech. Studied external and internal developers.

Skills

- **Owning UX:** Iterated documentation, UX copy, and technical marketing content for rapidly evolving products.
- **Distilling complex ideas:** Translated technical information into no-code API integration tutorials, code-heavy developer guides, API references, FAQs, landing pages, and blogs.
- **Methodical storytelling:** Analyzed craft elements in model content, style guides, and competitors' content.
- **Collaboration:** Writing partner who aligned and accelerated engineering, marketing, product, and support teams. My docs as code templates, runbooks, solution briefs, and workshopping reduced iterations.
- **Code examples and sample apps:** OpenAPI, AWS, k8s, Node, Java, C#, Python, Linux, pwsh.
- **Docs as code:** Markdown, HTML, XML, GitHub, Hugo, MkDocs, Redocly, pandoc, Make, Oxygen, Visio, draw.io, Figma.

Work Experience

Freelance Writer

- Stringing together gigs and updating portfolio: API docs, newsletters, JIRA user stories, AI agent autoharness mining better Japanese flash cards.
- Writing Qiita tech blog posts in Japanese.

Asteria Corp., Technical Writer

10/2018 – 6/2023 | Tokyo, Japan

- Relocalized the English documentation for Warp, a no-code data integration platform.
- Retranslated keywords from Japanese and “translated” technical information into a new documentation view based on DITA topic types.
- Wrote blog-like articles that fleshed out the new guides and explored real-world scenarios.

CData Software, Technical Writer

9/2013 – 10/2018 | Chapel Hill, NC

- Helped drive CData's ascent to an industry leader as their first technical writer.
- Coordinated localization for CData Japan.
- Tested products in development and reproduced customer issues, then wrote articles.
- Wrote 100s of integration guides to major analytics tools, data warehouses, SDKs, EAS, etc.
- Scaled docs-as-code for 2400+ products: 300+ SaaS, NoSQL, big data sources x 8+ technologies.

Education

Univ. of Southern California

8/2006 – 5/2011 | Los Angeles, CA

- BA in Creative Writing.
- Workshopped with kind, craft-based feedback.
